

Fork Lift Truck

Safety Awareness for Supervisors Course

The Course:

The course aims to give responsible persons adequate training in aspects of health and safety, monitoring standards and documentations necessary to cover Health and Safety Executive (H.S.E) guidance and use of equipment so that companies can comply with legislation.

Outcome:

Successful completion of the course will allow the learner to access qualified Fork Lift Truck operators within the workplace and give informant feedback on driving standards.

Benefits to employer and employee:

Candidates will have the ability to make suggestions to senior managers and operators regarding training needs.

Employers are benefited by the health and safety aspect of the course. Staff will be able to carry out correct procedures ensuring a safe working environment.

Course Modules:

- Fork Lift Truck accidents (the scale of the problem)
- Health and Safety Work Act 1974
- Use of Work Equipment Regulations 1998
- Maintenance and pre shift checks
- Fork Lift Truck stability
- Safe operating manoeuvres and operations
- Ramps and slopes
- Refuelling/ battery charging
- Code of practice

Factfile

Who is it for?

The course is open to all team leaders and supervisors. Candidates should have a basic understanding of the role of a supervisor and an understanding of the basic duties that they have to perform.

Progression:

Following Supervisors training, there are a number of complimentary courses, such as;

- First Aid at work
- Fire Marshal

These courses will help benefit both learners and employers.
