

Lista Caddy 20

The mobile tool cabinet

If you're going for peak performance – you need to be properly organised and have the best tools for the job. That is why motor racing teams all over the world use Lista drawer cabinets because the way tools are stored in the pit is vital to success. Why pay a lot more for inferior cabinets from the Far East when you can have the genuine Swiss engineered article for only... **£799**

LISTA

making workspace work

Quality Kraftwerk tools

The Lista Caddy comes complete with prestigious, professional quality Kraftwerk tool sets. The sets are specially designed to fit into the Lista Caddy 20 drawers. 3 sets can be placed in each drawer. Kraftwerk is the internationally registered brand of industrial tools which stands for high-quality tools and fits ideally into Lista's typically high standard of quality.

The ratchet handles are sturdy, impact-proof steel ratchets with an especially flat head and extremely high torque, single-finger switch action, bit ejection at the touch of a button, and a new ergonomic handle.

All sockets and operating components are forged from high-quality chrome vanadium steel. All metric sockets and extension bars are knurled to give optimum grip.

Bits and screwdriver bits are manufactured from special bit steel, a high-quality chrome-nickel-molybdenum-vanadium steel alloy. The base is made from the best chrome vanadium steel.

Where to put tools and materials so that you can reach them easily at any time? The Lista Caddy 20 allows them to be stored safely and moved quickly to your workplace.

With its manageable dimensions, the Lista Caddy 20 fits into any workshop. It provides ample space for even larger hand tools and power tools. Practical accessories can also be hung easily from the side panels, enabling the Lista Caddy 20 to carry everything where it is ready to use. Its impact-proof powder coating is available in a choice of standard colours.

Lista cabinets are known the world over for their very high quality, durability, longevity and efficiency:

- The smooth-running slides enable fully opening drawers ensuring access to the parts in the furthest corners. The drawers have a load capacity of 20 kg.
- The Lista Caddy 20 is fitted with a central locking system as standard so that all drawers can be secured simultaneously.
- The individual drawer blocking means that as soon as one drawer is opened, all others are locked. This prevents the cabinet from tipping forward.
- It is fitted with two smooth-running pairs of castors, two support castors and two steering castors with parking brakes.
