

Motor vehicle basic electrics

The course

A one day training session that will give the technicians a basic knowledge of vehicle electrics and how to test for basic faults. Learners will also be more confident using a multi-meter and LED style test lamp.

Outcomes

Upon successful completion of all the elements of the training the learner will have demonstrated their competence at checking for basic electrical faults.

Benefits to employer and employee

Learners will have a better understanding of vehicle electrical systems and will be able to diagnose and correct basic faults.

Course content

- Basic electrical principles
- Circuits and current flow
- Effective multi-meter use
- Starting systems
- Charging systems
- Batteries

Assessment

There will be no formal assessment although retained knowledge will be checked throughout the day.
